

Final Demonstration Event

20 November 2007

Escuela Técnica Superior de Ingenieros de Telecomunicación,
UPM

Avda. de la Complutense s-n. Ciudad Universitaria
28040 Madrid

SIXTH FRAMEWORK PROGRAMME

PRIORITY IST-2002-2.3.1.18

Information Society

Grid for complex problem solving

Proposal/Contract no.: 004293

1. Objectives

The AKOGRIMO project is coming to its end and we are organizing a public event where we will present our scenario on Disaster Handling and Crisis Management (DHCM).

The purpose of the AKOGRIMO final demonstrator is to show, validate and verify the usability of the technical architecture and inventions developed by the Akogrimo project to realize a useful application in the context of a Disaster Handling and Crisis Management (DHCM) scenario.

2. Logistic Information

The event will take place in Madrid, at UPM premises, in the Telecommunications School (ETSIT - Escuela Técnica Superior de Ingenieros de Telecomunicación), hosted by the Telematics Department group (DIT-UPM).

Building C (López Araujo) "Salón de Actos". Ground Floor
Escuela Técnica Superior de Ingenieros de Telecomunicación, UPM
Avda. de la Complutense s-n. Ciudad Universitaria
28040 Madrid

ETSIT is located in the main university campus of Madrid (Ciudad Universitaria) and can be accessed easily by public transportation. There are no hotels in a walking distance from the campus, so you will need to stay either in the downtown area with a lot of hotels, or in the nearby areas to the university campus. Both of them have good connections with the university by public transportation.

All the needed logistic information about transport and some accommodation suggestions are available at <http://www.dit.upm.es/travelinfo.html>

November 20th, 2007 16:00 – 18.00

Location:

Building C (López Araujo) "Salón de Actos". Ground Floor
Escuela Técnica Superior de Ingenieros de Telecomunicación, UPM
Avda. de la Complutense s-n. Ciudad Universitaria
28040 Madrid
